

KABUKI REVEALS

The Kabuki Reveak is a technique (generally used in Theatre and Special Events) where a drape or other lightweight fabric is quickly dropped from the ceiling to reveal the stage/performers/product. It is a modern day special effect based on the Kabuki theatre's technique of rapid appearance of actors.

SPECS

- » Power: standard 120V 60Hz
- » Dimensions: 4x4x8 inches (not including clamp)
- » Weight of each release unit: 7 lbs. (with clamp)
- » A single Cell Unit can hold and release 720+ pounds
- » Attachment clamp: 2" Mega-Coupler designed for standard 12" truss and 1.5" lighting pipe (other attachment methods are available)
- » Safety cable with quick clip attachment
- » 10 unit system drops a 70' curtain regardless of height, weight or direction of pull, which may be important in outdoor venues where wind can be a factor
- » Kabuki Drops are capable of a wide variety of release applications, they are not limited to just curtain drops
- » Optional Power Injectors and Control Signal Splitters are available for larger systems
- » Made in the USA
